IGDX Career Webinar "Crack the Code: Proven Strategies to Skyrocket Your Game Store Page to the Top"

Hassan Hafiz

Undergraduate software engineer | Game dev
Bogor, West Java, Indonesia

Summary

Passionate and ambitious undergraduate student majoring in Software Engineering, with a strong interest in both front- and back-end development. I am adept at transforming creative ideas into functional and user-friendly websites, and I have successfully created and executed a dynamic website to demonstrate my web development skills.

I bring hands-on experience from a productive internship in game design, where I developed my Blender abilities and helped create a Unity-ready component. This experience has provided me with a good foundation in 3D modeling and game development, allowing me to work on a variety of projects in the software engineering field.

I am dedicated to remaining current on industry trends and innovations, driven by a never-ending quest for information and innovation. My unique

Experience

Tortie Kreatif Teknologi
Game 3d asset Designer
December 2022 - January 2023 (2 months)
Kota Bogor, West Java, Indonesia

I was Assigned to make a 3D character in over 2 weeks a Game asset in over 1 week and a Game interior design as I was doing A blender Course for over 1 month
